# EVOLUTION Luminous Shelves

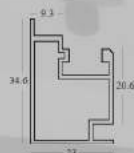

**Evolution** luminous shelves can be installed in the Evolution storage system or as standard shelves within a cabinet.

Anodized aluminum finish

4mm glass inserts

LED lights

## Luminous Shelf Profile

The anodized aluminum profiles that are the core build of the luminous shelves. It holds the top and bottom glass panels as well as the LED light strips.

## LED Light Strips

Many type of LED lights are available to fit your actual lighting.

*When ordering **Evolution Luminous Shelves**, some information is required so that the shelves are custom made to perfectly fit your environment and your project; the type of lighting in the room, how many shelves are connected together, the shelves disposition in the cabinet or **Evolution System** and whether the power cord goes to a wall outlet or directly to the household AC current. The shelves will then be built accordingly and fitted with the right type of LED lights and power supply.*

For your safety, electric installations should always be made by certified professionals.
