1. Set up the frame:

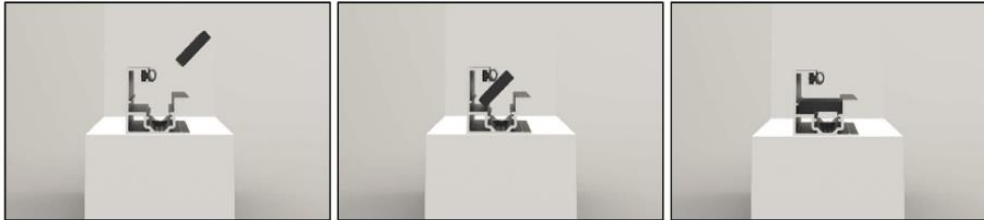

The installation support must be level, square and straight.

2. Fix the frame:

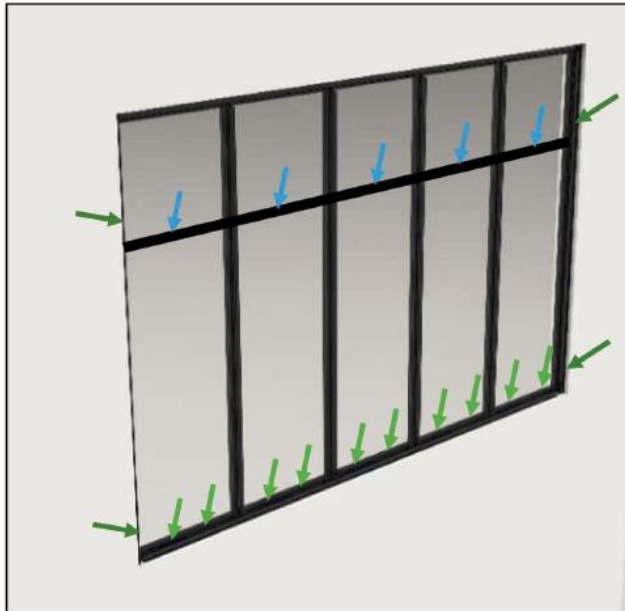

The fixing method, type(s) of dowels and screws, are chosen accordingly to the nature of the location's support and is the responsibility of the installer.

3. Fix the wedges:

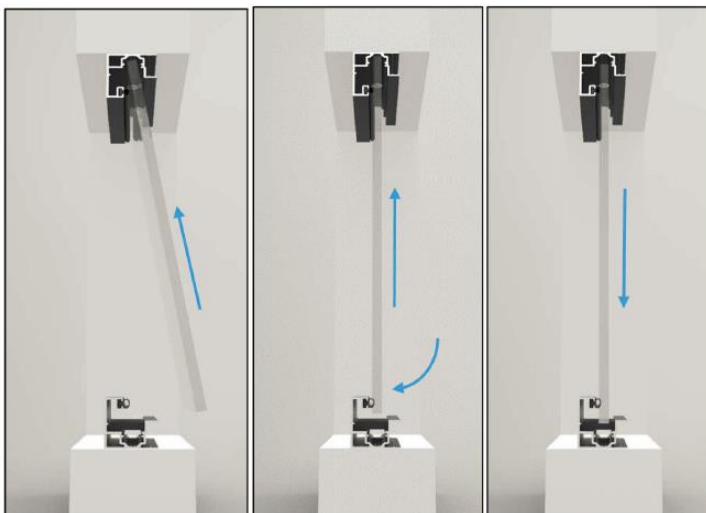

- ↓ 5 mm Wedge
- ↓ 2 mm Wedge
- 5 mm Wedge (side) with double side

The 5 mm wedges on the sides of the frame are necessary to hold the glass in place.

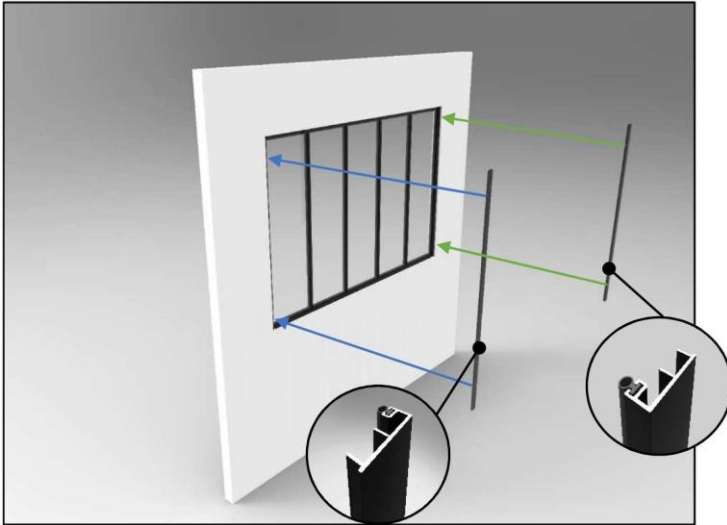

4. Set the glass:

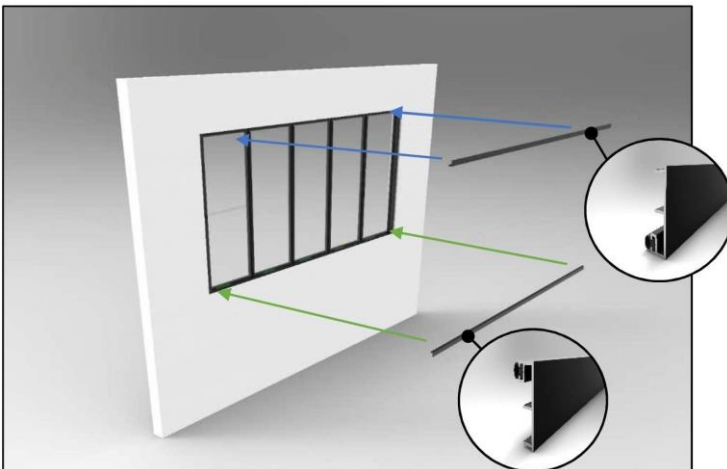

Thread the glass into the upper horizontal frame and let it rest on the holds.

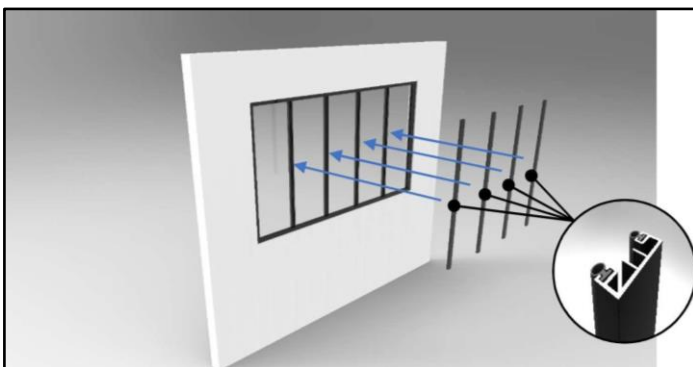

5. Set the parcloles:

Set the vertical frame parcloles.

Set the horizontal frame parcloles.

Set the divider parcloles.
